INTRODUCTION

Introducing the first-ever token with built-in instant referral rewards and a unique referral train system - introducing The MetaAltPad! The MetaAltPad came to be after years of research into cryptocurrency, blockchain technology, and how it could help the world.

The MetaAltPad is a token that you can buy, hold, invest in, trade, and spend. And it's the only token of its kind with built-in reward programs for referring others to join The MetaAltPad community. What makes this platform great? Instant rewards and referral trains! Just by holding tokens and referring others to join, you earn rewards daily.

The referral train is a system that lets everyone earn rewards by referring others to join the MetaAltPad family! The train is like a locomotive. When you join the MetaAltPad family, you become the first car. Then when you refer others to join, they become the second car, etc. You can have up to 5 cars attached to your train at any one time!

HOW METAALTPAD TOKEN WORKS

You can get any token of your choice by just holding the \$MAP tokens such as ETH, SHIBA, ADA, DOGE, DOT, BNB, BUSD, etc.

You can sell your \$MAP token at any time in the market by just signing and holding your \$MAP tokens.

We believe that the token economy is a new system based on Blockchain technology and can live forever. Token economy means the fair and transparent distribution of incentives for carrying out decentralized projects.

MetaAltPad is a Blockchain-backed platform that allows anyone to create their own token without having to understand Blockchain technology. If you are an independent artist, musician, writer or creator, you can create your own token and share your work.

We believe that our new system based on Blockchain technology will help you become the most famous creator in the world, making money rather than selling your work.

VISION

A decentralized economy is coming. We're not going back to the days when only a few were rich and everyone else struggled, so let's work together now for this new future where cryptocurrency will be in every portfolio!

A society that values financial security as much or more than physical safety cannot long withstand such disparities between those who control money over others' lives; it invites abuse from those able to purchase power at any cost whether through threats against individuals or their communities alike. But if we have learnt anything from recent history, no person can make decisions on behalf of all.

The MetaAltPad platform is designed to change how we perceive decentralized mobile applications by end consumers. The global adoption of the product with no limitations helps earn a handsome income through holding while maintaining privacy and security for users' autonomy all in one place! The team at MetaAltPad has created this ecosystem based on sound monetary policies which include a solid foundation put together so you can expect nothing less than excellence from them - even if your expectations may be high already since they always strive towards perfection as well.

MISSION

MetaAltPad Token is a joke and technology token that aspires to diversify and innovate the cryptocurrency market. As a meme token and a technology token, this coin is one step ahead. Its primary goal is to bring together technology and social services under one roof. The MetaAltPad Token was created as a consequence of our tireless efforts to create previously unseen advancements while avoiding the use of technology. The motive offered by our contingent whitepaper is to make users not only find out new coins but also to make them able to make the best decision. It will also enable them to decide a complacent decision whether they should reimburse or not in this trending company. It would assist them in getting acquainted with the decentralized policy that utilizes its users to wield and make better financial security risks.

OUR MOTIVE IS AS FOLLOWS

- Furnish this opportunity to every punter or client with easy and convincing methods to swap digital acquisitions.
- It will also decrease the setbacks for entrance to a more privileged financial ecosystem.
- To launch a community focalized and digital acquisition entirely decentralized in every term of the policy.

STAKING

MetaAltPad works on the BSC platform, which is eco-friendly, working on a proof of stake. BSC staking ensures users' funds are safe by leveraging effective security measures and providing Secure Asset Fund for Users (SAFU). Our staking method at the time of writing is arguably one of the safest and most eco-friendly methods (for cryptocurrency) to earn passive income.

The platform stores all staked coins using a secure wallet and a double-checking system. As more and more people, including institutional investors, realize the crypto market's lucrative nature, crypto staking is fast becoming a trend of earning passive income by simply holding or locking funds in a wallet. Since staking cryptos requires some technical crypto know-how and daunting requirements MetaAltPad staking platforms come in handy to allow investors, even those without technical knowledge of cryptos, to stake PoS coins and earn rewards. For only a percentage of your staking rewards, the staking platform lends you their technical expertise and validates stakes on your behalf, enabling you to earn passive income. The substantial growth of crypto staking has seen a boom in staking platforms allowing investors to earn staking rewards seamlessly. If you're thinking of making passive income through staking Then MetaAltPad is a fantastic option.

LIQUIDITY

The liquidity management logic of the Prism can also interface with the Deuliminator smart contract which acts as a community-funded liquidity injection mechanism. MetaAltPad that would otherwise remain idle and (holders) can be “staked” to provide liquidity injections at times of high Prism transaction volume. The “stakes” will be compensated based on the amount of liquidity drawn by the Prism.

Liquidity providers receive MetaAltPad tokens for providing liquidity. Users pay fees for trading on DEX, which is allocated to liquidity providers depending on the quantity of LP tokens or percent share they own in the pool. LP may suffer a temporary loss as a result of providing liquidity, and they may not get the same number of tokens back.

The unique feature that differentiates this token from others is, all the launchpad listing fees are only paid in Shiba tokens.

The primary goal is to keep the holder informed about the MetaAltPad Token performance by avoiding whale dips when they are used in a mass trade-off. MetaAltPad's token secret is LP. We have a function here that serves as a dual-beneficial implementation for holders. To establish a stable price floor. Second, the penalty serves as an arbitrage-resistant mechanism, ensuring that the volume of the MetaAltPad Token remains safe as a reward for the holders. In principle, the additional LP provides stability by adding the tax to the token's total liquidity, thus raising the token's overall LP and maintaining the token's price floor.

The price stability of the MetaAltPad Token LP mimics this function, with the added advantage of a firm price floor and cushion for holders. The aim is to avoid bigger drops in the price when whales opt to sell their tokens later in the game, which prevents the price from changing as much as it would if the LP mechanism wasn't in place. All of this is in an attempt to address some of the issues with the existing reflection tokens. For these reasons, we are sure that our system and protocol will triumph over outdated reflection tokens are sure that our system and protocol will triumph over outdated reflection tokens.

VAULT

The MetaAltPad wallet version is supported on both Android and iOS. The vault is highly focused on enabling users to manage their coins and interact with the ecosystem. The private keys for the vault are stored on the user's device and are secured through Secure Enclave and biometric authentication technology.

Users can complete all the normal functions that a vault provides. They can monitor their balance as well as send and receive coins. Users can also exchange on through the MetaAltPad vault and use and swap their coins. The vault enables users to access decentralized exchanges so that they can easily convert between their coins. MetaAltPad vault is fast, secure, and will have a low transaction fee than others, and users can donate and vote for the organization by using our vault. A user can hold and swap by using the MetaAltPad vault.

HERE ARE SOME OF THE IMPORTANT FEATURES OF VAULT

- Easy to use. It's just like any other software or vault that you use for your day-to-day transactions.
- Highly secure. It is just a matter of securing your private key.
- Allows instant transactions across geographies. And these are barrier-free, without intermediaries.
- Low transaction fees. The cost of transferring funds is much lower than with traditional banks.
- Allows transactions across multiple cryptocurrencies. This helps you do easy currency conversions.

LAUNCHPAD

MetaAltPad launchpad is a Multi blockchain-supported platform that fills the gap between the investors-fundraiser and the decentralized protocol of cryptocurrency. Our aim is to connect the world for borderless transactions for the fundraising of a new project while giving the investor the ability to research a new coin. We provide an opportunity for investors to better educate themselves through more information globally, with less uncertainty by using the Binance compliant platform. We can eliminate manual errors and ensure stability, clarity, and immutability during recording by leveraging state-of-the-art Binance-based smart contract technology.

MetaAltPad helps new projects attract the community, by allowing them to list their new coin, prior to launch, on our innovative MetaAltPad Launch directory which contains all the details related to the coin/token along with their official website, and the link of their telegram is hyperlinked on website. MetaAltPad launchpad is a multi-blockchain-supported launchpad that helps in raising capital from investors. MetaAltPad launchpad supports BNB, Ethereum and Matic supported coin/token.

KYC IS THE VERIFICATION PROCESS THAT CUSTOMERS GO THROUGH IN ORDER TO

- Verify their identity and link it to a MetaAltPad wallet
- Get a better understanding of the potential customer's activities and determine whether or not these are of legal nature.
- Evaluate the possibility of money laundering risks associated with a particular customer

MULTIPLE TOKEN REWARD SYSTEM

Allowing the user to select a specific token to be rewarded with. These currencies can be selected from our dashboard selections: ETH, ADA, DOGE, SHIBA, DOT, BNB, BUSD.

The multiple token reward system makes us unique, and we will have a buy and sell tax included in every MAP token transaction, resulting in 6%-7% of all MAP tokens being distributed to token holders.

UNIQUE REFERRAL SYSTEM

Referrals can easily link to our website anytime without having to log in or register with our site using the fully DeFi based referral system we implemented. There is a referral link for every user that is unique and allows them to share their referral link with friends, family members, and community members to earn a passive income..

NFT MARKETPLACE

MetaAltPad Non-fungible tokens (NFTs) are one-of-a-kind, non-transferable assets created on the blockchain. These tokens may be connected to anything in the MetaAltPad game. NFTs' basic characteristics provide them a distinct value and categorically distinguish them from other forms of assets. These characteristics include verifiably uniqueness and indivisibility. Because the underlying code is transparent, the scarcity and ownership of any given token can be determined without the use of a trusted middleman. The rise of NFTs, in our opinion, is part of a larger paradigm shift away from centralized to decentralized systems.

This platform is now allowing makers of digital collectibles to experiment with new revenue strategies. Each MetaAltPad underlying token has a genome that specifies its look, characteristics, and its origin. MetaAltPad cannot be duplicated or distributed without the consent of the user.

HOW METAALTPAD ECOSYSTEM IS TRANSFORMING THE NFT

For a long time, the gaming business has struggled with concerns such as transparency, authenticity, ownership, provenance, copyright, and counterfeiting. Furthermore, the business has always been confined to the wealthy few who can afford to spend millions of dollars on a single NFT item. On the other hand, is definitely designed for everyone to enjoy, and it has the ability to transcend all social and economic barriers.

The above-mentioned challenges are largely eliminated with our built environment. And the gaming business has produced and successfully deployed incredible and complex works of art. We're ready for a shift in how NFT is bought, marketed, sponsored, loved, and even made.

VALUABLES OF METAALTPAD NFT

VALUABLES OF METAALTPAD NFT

1- LIMITED

The shortage of NFTs adds to their appeal. NFT developers may build a limited number of non-fungible tokens to keep the value of the NFTs up.

2- INDIVISIBLE

The majority of NFTs are indestructible into smaller units. You will not be able to purchase a digital item until you pay the full fee.

3- UNIQUE

NFT is completely safe and accurate because it has a robust information tab. This feature makes the NFT more unique and potent.

BENEFITS OF METAALTPAD NON-FUNGIBLE TOKEN (NFT)

Decentralized exchanges have been transformed by non-fungible tokens. There are some of the advantageous benefits of this cryptocurrency;

1- Easily Transferable:

The transfers of NFTs are centred on their uniqueness and indivisibility. You can transfer, sell or auction your NFTs in the MetaAltPad NFT Marketplace with one click.

2- Trustworthy:

MetaAltPad NFTs are based on blockchain technologies. Consequently, you must be confident that your NFT is right, as counterfeiting a decentralized and permanent record is difficult.
